

## **Face Masks: relaxation of current guidance**

**With effect from Monday, 13<sup>th</sup> June 2022,  
Patients / visitors to the Practice do NOT  
have to wear a face mask unless they have  
respiratory symptoms e.g. coughs, colds etc;  
are at high risk of infection due to  
immunosuppression; have suspected Covid  
or unless it is their personal preference to  
wear one**

**There may be occasions when a Clinician will  
ask you to wear a face mask and we would  
be grateful if you would respect their  
request.**

**Thank you for your continued support**
